Dear Mr Overfelt

Thank you for your letter of March 1, 1988 regarding Environmental Protection Agency's study of a site near Desloge, Missouri

Department staff has completed an examination of map files and data storage and determined that there are no sensitive species or communities occurring on the immediate site or within two miles of the area. We do not have information in our files regarding freshwater wetlands that may be located within one mile of the site

Thank you for the opportunity to review and comment

Sincerely,

DAN F. DICKNEITE
